

Other Oil UK Products for Industry

OIL UK NEAT CUTTING OILS

NEATCUT LVA	Low viscosity oil for aluminium, steel and yellow Metals
NEATCUT MVS	For heavy duty steel, aluminium and yellow metal machining
NEATCUT GP	General purpose grade for all metals
NEATCUT TRG	For tapping, thread rolling and gear cutting
NEATCUT BR	Broaching, tapping, threading and reaming oil for all metals
NEATCUT CFN	Chlorine free drilling, grinding and gear cutting oil for all metals
NEATCUT HNY	Low viscosity honing and lapping oil for all metals
NEATCUT DHB	Low viscosity deep hole boring fluid for ferrous metals
NEATCUT SAL	Low viscosity sawing oil for all metals
NEATCUT 51-4	Special grinding and honing oil for hard ferrous alloys and superfinish work with tungsten carbide.
ENVIROCUT 40	Synthetic minimal lubrication oil for mist and flood applications

OIL UK DRAWING, FORMING AND PRESS LUBRICANTS

SUPERDRAW EP 70	Medium viscosity neat forming oil for ferrous and non-ferrous metals
SUPERDRAW EP 120	Neat high viscosity deep drawing and tube drawing oil for all metals
SUPERDRAW 700	Very high viscosity neat tube bending, tube drawing oil
VANISHING OILS	A comprehensive range of fast drying vanishing press lubricants
PRESSLUBES	Forming, piercing and press lubricants – oil, water and solvent based

OIL UK SPARK ERROSION OILS

A comprehensive range of mineral oil and synthetic based products for all EDM applications.

OIL UK HEAT TRANSFER FLUIDS

High quality mineral oil, synthetic and food grade Heat Transfer Fluids

OIL UK QUENCH OILS

Accelerated, standard and hot quench grades

OIL UK TURBINE OILS

Super refined high quality turbine oils

MACHINE TOOL MAINTENANCE & MONITORING EQUIPMENT

System Cleaner, Bacteria Control Biocide, Spindle Lubricant, Spindle Coolant, pH Monitors, Emulsion Concentration Refractometers, Soluble Oil Automatic Mixer Units

Oil UK Lubricants

Oil UK is literally at the cutting edge of modern metalworking fluid technology as well as being a leading supplier of high quality, competitively priced British and European maintenance lubricants.

Oil UK metalworking fluids are the results of continuous research and development and are designed to provide our customers with performance beyond expectation. This includes the following as standard:

- Extreme Pressure additives for high friction conditions and increased tool life
- Exceptional lubricity for high quality surface finish
- Foam control for soft water and high pressure / high flow rate systems
- Scum control for hard water conditions
- Modern, safer components
- The very latest technology for bacteria control to provide extra long sump life and reduced down time
- Enhanced operator safety
- Reduced swarf carry out leading to lower coolant losses
- Greater confidence in knowing that your operators, machines and components are all in safer hands

Your local official Oil UK Distributer:

Oil UK Today

Oil UK is committed to quality, innovation and product excellence. These are the core values in everything that we do.

The key to Oil UK’s success is the forging and nurturing of partnerships at all levels – with our distributors, and our direct customers and suppliers alike. This has enabled Oil UK to cultivate a vibrant, customer focused approach based on excellent product performance and service levels.
